Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6), Bootstrap, Vue, TypeScript

Backend: Node.js, Express.js

Databases: MongoDB, MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Docker, VS Code, Postman, Figma (basic), CI/CD

Other: RESTful APIs, Responsive Web Design, Agile Development

Education

Diploma in Computer Programming

Georgian College, Barrie, Ontario

Graduated Dec 2024 | Dean's List (All Semesters)

Key Coursework: Web Development, Database Systems, Software Engineering

Projects

Job Tracker Web App (Full Stack)

Tech: Node.js, Express.js, MongoDB, HTML, CSS, Bootstrap

- Developed a full-stack application to help users manage and track job applications.
- Integrated job sorting and filtering functionalities, reducing the average job search time for users by 25% and saving each user up to 10 hours per month.
- Stored user and job data in MongoDB, and consumed external APIs for job listings.

Movie Search App (Frontend + API Integration)

Tech: Node.js, Express.js, MongoDB, HTML, CSS, Bootstrap, Docker, REST, GitHub

- Prepared efficient data indexing using MongoDB and caching mechanisms, reducing average API response time by 20% and handling over 1,000 movie data points in the search interface.

- Developed and maintained comprehensive documentation for the Movie Search App, including API specifications, data models, and user guides, ensuring clarity and ease of use for developers and end-users.

Personal Portfolio Website

Tech: HTML5, CSS3, JavaScript

- Created and deployed a responsive personal website to showcase projects and contact information.
- Revised user-centered design principles on the personal website, resulting in positive feedback from three users regarding improved navigation and ease of use (direct replacement).

Experience

Web Developer Intern

Jan 2024 – Present

- Designed and implemented five new UI features on company website, writing over 600 lines of clean, well-documented code, which improved user engagement based on initial A/B testing results.
- Identified and resolved seven UI bugs through open-source contributions, including fixing the three most common UI issues reported by users, enhancing overall user experience.
- Collaborated with cross-functional teams to gather requirements and translate them into technical specifications, ensuring alignment with project goals and delivering solutions that meet business needs.
- Implemented automated Unit Tests for the existing codebase utilizing VS Code, achieving 85% test coverage and reducing manual testing time by approximately 15 hours per week.
- Developed a REST API using Node.js to fetch job data from three external sources, saving the team from two hours of manual work and providing real-time updates to users.

Certifications

- Responsive Web Design – freeCodeCamp
- JavaScript Essentials – Solo Learn
- Git & GitHub for Beginners – Coursera

Soft Skills

- Clear and professional communication in team and client interactions
- Collaborative contributor with experience using Git and Agile practices

- Debugged and resolved 15+ identified bugs within the job application tracker, enhancing code stability and user experience, and achieving a 12-point performance improvement score on the application's performance.
- Committed to writing clean, maintainable, and well-documented code
- Quick to learn and apply new technologies through hands-on projects
- Spearheaded the resolution of 18 bugs, increasing application stability, and improved average loading speed by 1.5 seconds through code optimization and database indexing techniques.

Additional Information

- Open to relocation within Canada
- Fluent in English and Gujarati
- Eligible to work in Canada without sponsorship
